

QUALITY BEST PRACTICE TIPS

CHILD AND ADOLESCENT MEASURES FOR ALL PAYERS

General Recommendations:

- Schedule **Visits timely** to ensure **age requirements** are met for the patient, including follow-up visits for 2-dose vaccines. There must be at **least 146 days** between the first and second dose of the HPV Vaccines and **14 days** between visits.
- Take advantage of every visit including sick visits to address the **preventive care measures**.
- Use **appropriate billing codes** for each measure to ensure credit is provided. Codes are included for your review.
- Comply with **documentation and timeliness requirements** related to vaccine administration.
- Consider an expansion of your **office hours into the evening, early morning, or weekends** to accommodate working parents.
- Use **Telehealth** when appropriate including for W30.

Childhood Immunization Status (CIS):

Children **2 years of age** who had **4 DTaP** (90698, 90700, 90723), **3 IPV** (90698, 90713, 90723), **1 MMR** (90707, 90710), **3 HiB** (90644, 90647, 90648, 90698, 90748), **3 HepB** (90723, 90740, 90744, 90747, 90748), **1 VZV** (90710, 90716), **4 PCV** (90670), **1 HepA** (90633), **2 or 3 RV** (90681, 90680), and **2 flu** (90655, 90657, 90661, 90673, 90685, 90686, 90687, 90688, 90689) vaccines by their **second birthday**.

Child and Adolescent Well-Care Visits (WCV):

Children who turn **3-21 years**: 1 or more **well-care visits** during measurement year, which must occur with a **PCP or an OB/GYN** practitioner that does not have to be the provider assigned to the member.

ICD: 200.00, 200.01, 200.129, 200.121.

CPT: 99381, 99382, 99384, 99385, 99391, 99392, 99394, 99395, 99461.

Lead Screening in Children (LSC):

Children who turned **2 years old** during the measurement year must have **1 or more capillary or venous lead blood tests for lead poisoning** (Lead Tests Value Set) by their 2nd birthday. When documenting lead screening, include the **date** the test was performed and **results**.

CPT: 83655.
